Healthy Weight

A Healthy Source of Omega-3 Fatty Acids

Rich in omega-3 fatty acids, Healthy Weight is supportive in many ways, including skin, coat, and muscle health. For horses that need to gain weight, Healthy Weight provides calories in addition to forage. It is made from flax oil, a rich source of omega-3 fatty acids, which makes it a healthy alternative to corn oil.

FEEDING DIRECTIONS

Feed 2 oz (60 mL) once or twice daily.

Can be used as a top dressing. Serving based on average horse weight of 450 kg. Recommended for use within 6 months of manufacture date.

A COMPLEMENTARY FEED FOR HORSES

Analytical Constituents:

Crude Fat (min) 99.9%

Composition: Flaxseed Oil (98.9%)

Additives:

Nutritional Additive: Vitamin E (3a700) 400 IU
Technological Additive: Ascorbyl Palmitate (1b304), preservative

SIZE

3.79 L (1 gal)

SERVINGS

64 servings

Body Condition Score for Optimal Health and Performance

The Body Condition Score (BCS) can be a useful tool for developing diets appropriate for maintaining the health and longevity of an individual horse. The optimal BCS range is between 4 to 6 with a BCS of 5 being the ideal. Increasing a single body condition score requires about 40-45 pounds of body weight.

Underweight: BCS < 3

Horses are generally considered to be underweight with a BCS < 3. Being underweight may affect overall health and athletic performance.

Overweight: BCS > 7

A BCS of 7 is considered overweight, and BCS > 8 is obese. Being overweight may contribute to a multitude of health issues and should be avoided for the overall well-being of the horse.

Why is the Omega-3 to Omega-6 Ratio Key?

Omega-3 fatty acids are the “good fats” required by every cell in the body to properly function. Unable to produce adequate omega-3 fatty acids on their own, horses must instead rely on diet to provide these essential fatty acids. Omega-6 fatty acids, though required in moderation, are pro-inflammatory and can have a negative effect on health.

Natural Grazing Diet

Healthy Weight

Corn Oil

Support For Optimal Weight in the Horse

By supporting a properly-functioning gastrointestinal system, Platinum Performance® Equine can help maintain normal weight levels for horses that are too heavy or light and need to increase their weight level.

WHICH PRODUCT IS RIGHT?

Weight Gain

Administer 1-2 scoops of Platinum Performance® Equine and 2-4 oz Healthy Weight oil BID.

Coat, Mane and Tail

Administer 1 scoop of Platinum Performance® Equine BID and 2 oz Healthy Weight oil SID.
