

# BONE SUPPORT

## Supports the bone development

### Characteristics

Complementary feed for horses and ponies. Prequine Bone Support can be supplemented to horses and ponies in case of calcium deficient diets. The main ingredient in Prequine Bone Support is a human grade ingredient and is developed according to scientific insights. It contains calcium carbonate and trace elements isolated from the eggshell matrix from the Gallus gallus domesticus (domestic fowl). Calcium carbonate and trace elements play a very important role in the body as it supports the normal functioning of bones, muscles, nerves and cells. The combination of calcium and trace elements has a positive effect on the bone mineral density and supports the bone development.

### Directions for use

Mix with feed.

Horses: 1 x 20 g per day.

Ponies or foals: Half of the above-mentioned quantity.

### Storage

Store dark and dry at 15-25°C.

Close packaging after each use.

Keep out of sight and reach of children.

### Presentation

Jar à 500 g.

Bucket à 10 kg.

### Shelf life

3 years from manufacturing date (MFD).

### Composition

#### Contains:

Calcium carbonate from eggshells, calcium carbonate.
