WHAT IS CUVESTREQUIN?

Cuvestrequin is a topical gel barrier for use in horses with broken or irritated skin. It's a suitable alternative to conventional bandages used to support the management of wounds.

WHAT ARE THE INGREDIENTS IN CUVESTREQUIN?

Cuvestrequin is made from a natural polymer complexed with metal salts in an ethanol base. The gel is completely biodegradable.

CUVESTREQUIN™

INTELLIGENT PROTECTION FOR BROKEN SKIN

DL CUVESTREQUIN May 2026 V2.indd 1-2 11/05/2026 15:53

NoBACZ Healthcare

CUVESTREQUIN

- Intelligent protection for broken skin
- Waterproof, biodegradable gel barrier designed to support equine skin
- Easy to apply - top up as necessary
- Non-colonisable surface resists biofilm formation – not a substrate for bacterial adhesion
- Non-occlusive design – allows movement and drainage at the affected site
- Non-restrictive application – supports comfort and minimises pressure on affected tissue.
- Provides a physical barrier against debris and insects in the environment

HOW TO USE

Clipping should be done ahead of Cuvestrequin application

Clean the affected area

Dry the area

Apply Cuvestrequin evenly with a gloved hand, up to 3mm thick

Allow gel to dry in a clean dry environment for up to 30 minutes

The site is now protected for up to 24 hours
