# STATE OF THE ART CELLULAR TECHNOLOGY

HorStem is the only ready-to-used equine umbilical cord pluripotent Mesenchymal Stem Cell medicine worldwide

## LAMENESS CAUSED BY OSTEOARTHRITIS

Osteoarthritis is responsible for 60% of equine lameness and is the main cause of premature sport life withdrawal.

## STEM CELL TREATMENT

Reduces lameness grade and clinical symptoms for longer than 12 months. It is the only treatment that **slows down articular degeneration**.
